

The leading edge of the circular economy

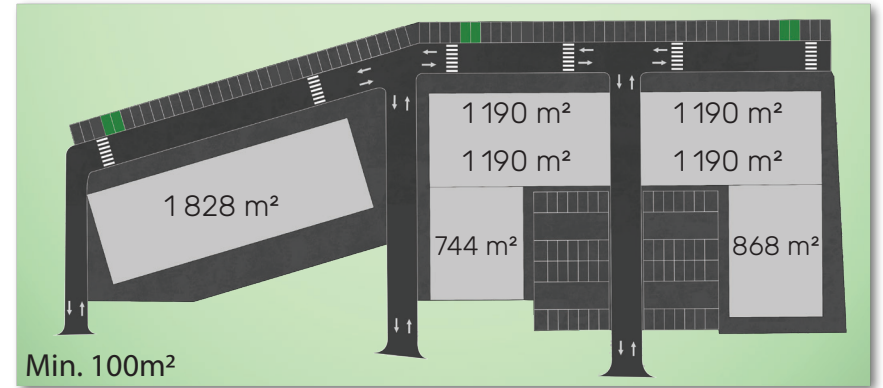

Circle's Edge is a concept for businesses that value sustainability and profitability.

The premises where a business chooses to establish their operations, is a significant aspect of the supply chain. It's also difficult to change once the decision has been made.

Therefore, we want to offer your business the opportunity for a long term solution that not only communicates sustainability, but also lives up to the promise of providing a long term solution for your facility needs.

Circle's Edge is suitable for:

Production

Office spaces

Warehousing

Retail

...and for any business that wants to work with us to find a suitable, custom solution.

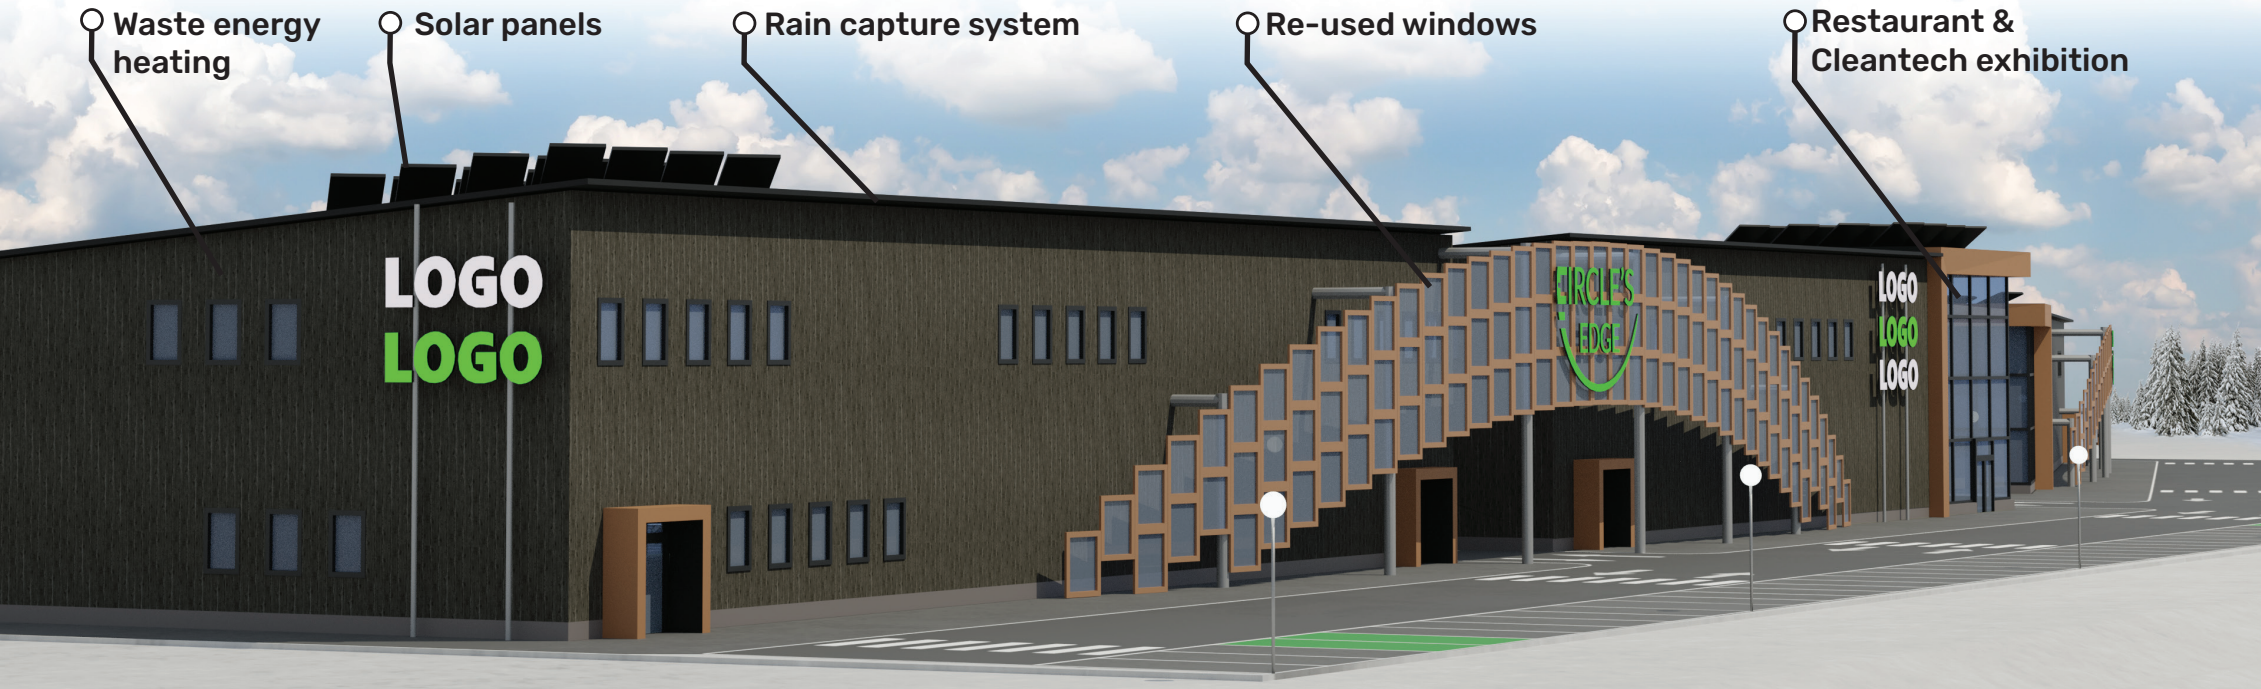

Waste energy heating

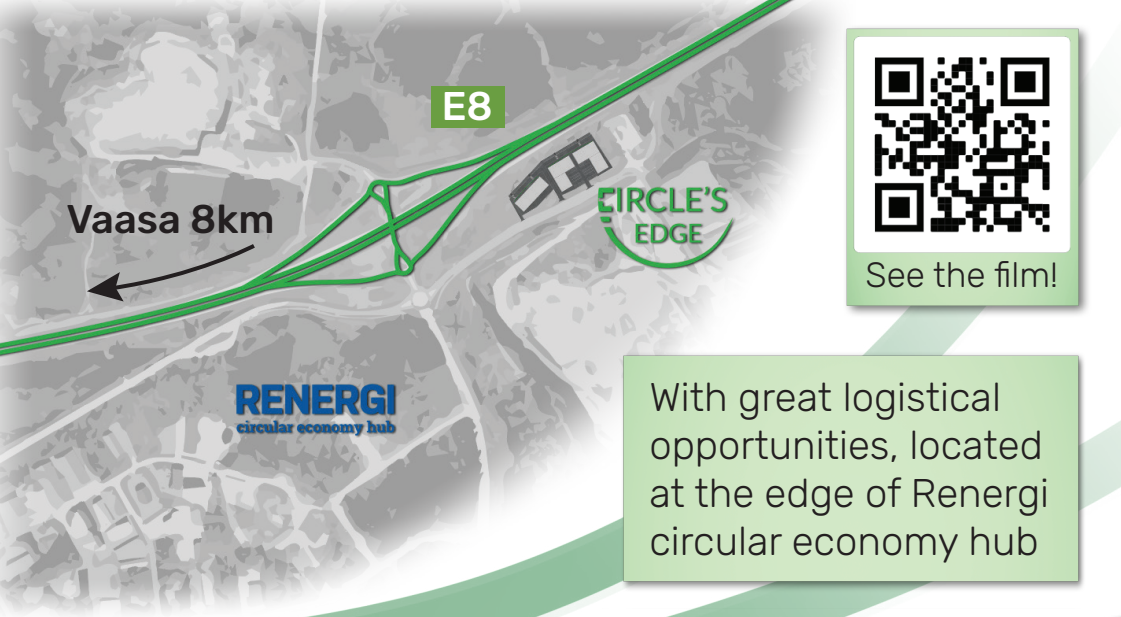

Solar panels

Rain capture system

Re-used windows

Restaurant & Cleantech exhibition
